**Note 1:** The above household waste summary is based on the definitions used for Government indicators, and therefore exclude rubble. See links on right handside for further information on these definitions.

**Note 2:** The rise in the tonnes of household waste collected in 2008/09 is due to the reclassification of some waste streams from commercial waste to domestic waste following the clarification of guidance issued by DEFRA. This includes waste collected from charities and nursing homes, which is commonly refered to as 'Schedule 2' waste (further information can be found within Schedule 2 of the Controlled Waste Regulations 1992.)
